

DATA, CLOUD, and AI SPECIALISTS

exactly when you need them

Our 20 years of experience in data engineering provides a solid foundation for being the best consulting company in this field in Poland. Our mission is to put your business goals first!

HOW DO WE WORK?

PROBLEM STATEMENT

Implementing new initiatives in data engineering often involves lengthy deployment processes, largely due to limited involvement of qualified consultants. These issues are further complicated by challenges in managing the costs of recruiting, retaining, and training specialists. As a result, project timelines suffer, reducing the likelihood of achieving key business objectives.

SOLUTION

Integral Solutions Outsourcing – smart support for your projects:

- Gain access to proven experts**
 Benefit from the knowledge and experience of high-caliber professionals, supported by a transparent recruitment process and premium customer care
- Reduce costs and increase hiring flexibility**
 Remain flexible and react faster to changing business needs
- Deliver your projects faster**
 Reduce implementation time and comply with regulations to avoid potential penalties
